CONTENTS

VOLUME 1

SECTION 1: PREAMBLE

1. Introduction ................................................................. 3
   V Mohan, BB Tripathy

2. Landmarks in the History of Diabetes ............................ 6
   BB Tripathy
   The Ancient Era (Up to 600 AD) 6; Medieval Period (600-1500 AD) 7; Advent of the Modern Era (1500-1750 AD) 7; Progress of Modern Era 8; Clinical Types of Diabetes (Classification) 14; Epidemiology 17; Complications 18; Diabetes and Pregnancy 22; Control and Complications 23; Animal Models for Study of Diabetes 23; Epidemiology of Diabetes—Indian Scenario 26; Newer Developments in Diabetes Treatment 27

SECTION 2: PHYSIOLOGY AND METABOLISM

3. Intermediary Metabolism and Hormonal Regulation ........ 43
   NC Panda
   Major Metabolic Pathways and Control Sites 43; Stages of Extraction of Energy from Foodstuffs 45; Recurring Motifs in Metabolic Regulations 46; Major Pathways of Metabolism and the Principal Sites for their Control 48; Hormonal Regulation of Intermediary Metabolism 55; Insulin 56; Glucagon 58; Epinephrine and Norepinephrine 59; Somatostatin 59; Glucocorticoids 60; Growth Hormone 60; Pancreatic Polypeptide 61; Fed State 61; Fasted (Post-absorption) State 62; Starvation 62; Prolonged Starvation 63; Diabetes Mellitus 63

4. Morphology of Pancreatic Islets .................................... 68
   M Balaraman Nair
   History 68; The Islets 69; Exocrine-endocrine Interaction 75; Conclusion 76

5. Insulin Biosynthesis and Secretion ................................ 77
   PS Lamba
   Organization of Islets of Langerhans 77; Islet Structure 78; Insulin Gene Expression and Its Regulation 78; Insulin Biosynthesis: Post-transcriptional Events 81; Fate of the Mature Secretory Granule 84; Glucose and Signal Recognition 86; Fail-safe Regulation of Insulin Secretion 88; Control of Calcium Level: ATP Sensitive K+ Channels 88; Molecular Identity of the K ATP Channel 89; Insulin Secretion Via K ATP Channel Independent Pathways 90; Potentiation of Secretion by Various Agents 90; Second Messengers and the Regulation of Insulin Secretion 92; Effector Systems for Insulin Secretion 94; Insulin Secretion and Diabetes 95

6. Biology of Insulin Action ............................................. 106
   Sushil Jindal
   Biological Firsts About Insulin 106; Structure-action Relationship of Insulin Molecule 106; Insulin Receptor 107; Postreceptor Events and Downstream Signaling 108

7. Anti-inflammatory and Anti-atherosclerotic Effects of Insulin—Effects Beyond Glycemic Control .............. 111
   Paresh Dandona, Devjit Tripathy, Sandeep Dhindsa
   Introduction 111; Atherosclerosis 111
SECTION 3: DIAGNOSIS AND CLASSIFICATION

8. Definition, Diagnosis and Classification ................................................................. 121
   BB Tripathy
   Definition 121; Diagnosis 122; Classification 131; Modified Classification 136

9. Latent Autoimmune Diabetes in Adults .............................................................. 141
   Devjit Tripathy, Leif Groop
   Definition: Clinical Characteristics 141; Pathogenesis 142; Chronic Complications in LADA 144; LADA in the Indian Population 144; Screening for LADA 144; Management of LADA 145; Newer Potential Therapies for LADA 145

10. Impaired Glucose Tolerance and Impaired Fasting Blood Glucose ...................... 148
    Dinesh K Nagi
    Prevalence of IGT 149; Instability of IGT 149; Etiology and Pathogenesis of IGT 150; Clinical Implications of IGT 151; Risk Factors for Deterioration to Diabetes 151; Association with Cardiovascular Disease Mortality 152; Intervention Studies in IGT 152; Impaired Fasting Glucose 155

SECTION 4: EPIDEMIOLOGY

11. Diabetes Mellitus in Developed Countries ......................................................... 163
    Susana A Moran, KM Venkat Narayan
    Type 1 Diabetes 163; Type 2 Diabetes 165; Gestational Diabetes 167

12. Epidemiology of Diabetes in Developing Countries: The Scenario in Asia ................. 171
    A Ramachandran, C Snehalatha
    Scenario in South East Asia 171; Rising Prevalence of Diabetes 172; Risk Factors 174; Chronic Complications of Diabetes 176; Type 2 Diabetes in Children 177; Scenario in the Middle East Countries 177; Other Forms of Diabetes 178; Prevention of Diabetes 178

13. Epidemiology of Diabetes Mellitus in India ....................................................... 181
    SV Madhu, PV Rao
    Type 1 Diabetes Mellitus 181; Type 2 Diabetes Mellitus 182; Impaired Glucose Tolerance (IGT) 188; Complications 189

14. Epidemiology of Diabetes in Indian and Other Migrant Populations and Special Groups .............................................. 197
    Venkata Ranga Rao Kodali
    Overseas/Transcontinental Studies 197; Migration within India 199; Other Migrants and Special Populations 200

SECTION 5: ETIOPATHOGENESIS OF DIABETES MELLITUS

15. Etiology of Diabetes: An Overview .................................................................... 205
    Ashok Kumar Das, BB Tripathy
    Type 1 (A) Diabetes Mellitus 205; Type 2 Diabetes Mellitus 207; Gestational Diabetes Mellitus (GDM) 209; Other Types 209

16. Type 1 Diabetes Mellitus: Pathogenesis and Metabolic Alterations ...................... 210
    Eesh Bhatia
Contents

17. Pathogenesis of Type 2 Diabetes ......................................................................................................................... 223
   BB Tripathy, Devjit Tripathy
   Glucose Homeostasis 224; Insulin Resistance (IR) 224; Impaired β-cell Function 232; The Natural History of Type 2 Diabetes 243

18. Insulin Resistance ................................................................................................................................................. 251
   RD Lele, AR Marita
   Concept of Hormone Resistance 251; Evolution of the Concept of Insulin Resistance 253; Molecular and Cellular Mechanisms in Insulin Signaling 254; Dietary Fat and Insulin Resistance 269

19. Endocrine and Metabolic Role of Adipose Tissue in the Pathogenesis of Diabetes Mellitus ......................... 277
   Sushil Jindal, Sunil Gupta
   Leptin 278; Resistin 279; Tumor Necrosis Factor-α (TNF-α) 279; Interleukin-6 (1½-6) 279; Adiponectin 280; Free Fatty Acids: Another Player for Insulin Resistance 281

20. Role of Intrauterine and Infantile Malnutrition in the Pathogenesis of Diabetes ............................................. 284
   Nishit F Shah
   Malnutrition and Diabetes Mellitus 284; Mechanisms Linking Malnutrition and Diabetes 286; Prevention of Diabetes 287

21. Biochemical Parameters and Hormonal Profile in Diabetes ............................................................................... 290
   C Snehalatha, Vijay Viswanathan
   Diagnosis of Diabetes 290; Glycosylated Hemoglobin (GHb) 293; Dyslipidemia in Diabetes 294; Serum Electrolytes 295; Kidney Function Tests 295; Insulin and Diabetes 297; Classification of Diabetes 300; Study of Hypoglycemia 301; Mode of Action of Drugs 301; Proinsulin and Insulin Ratios 302; Other Hormones Involved in Glucose Homeostasis 302; Hypoglycemia and Glucagon Secretion 302; Hyperglycemia and Glucagon 302; Leptin and Adiponectin 302; Glucagon-like Peptide (GLP-1) 303; Homocysteine 303; Quality Control 303

22. Pathology of Pancreas in Diabetes Mellitus ........................................................................................................ 306
   SJ Nagalotimath
   Type 1 Diabetes 306; Type 2 Diabetes 308; Other Specific Types of Diabetes 308

SECTION 6: GENETICS AND IMMUNOLOGY

23. Genetics of Diabetes: An Overview .................................................................................................................... 319
   V Radha, V Mohan
   Genetics of Type 1 Diabetes 319; Genetics of Type 2 Diabetes 321

24. Immunogenetics of Type 1 Diabetes ................................................................................................................... 327
   Ramachandra G Naik, CB Sanjeevi
   Immunologic Aspects of Type 1 Diabetes Autoantibodies 328; Autoimmune Antibodies in Autoimmune Diabetes 328; ICA512/IA-2 Antibodies 329; Cellular Immune Response and Cytokines 330; Genetic Aspects of Type 1 Diabetes 331; Natural History of Type 1 Diabetes 333; Environmental Factors in Type 1 Diabetes 334; Possible Environmental Mechanisms 335
25. Monogenic Forms of Diabetes Mellitus and Maturity Onset Diabetes of Young .............................................. 341
   V Mohan, Ami Ritesh Sanghvi
   Definition of Monogenic Forms of Diabetes 341; Maturity Onset Diabetes of Young (MODY) 341; Other Monogenic
   Forms of Diabetes 347; Rarer Forms of Monogenic Diabetes 347

26. Studies on Genetics of Diabetes in Ethnic Indians .............................................................................................. 349
   V Radha, V Mohan
   Familial Aggregation of Diabetes in Indians 349; Is Insulin Resistance Also Genetically Inherited in Indians?
   350; Studies on Genes Related to Type 1 Diabetes 350; Studies on Genes Related to MODY
   in Indians 350; Studies on Genes Associated with Insulin Secretion in Indians 352; Studies on Genes Associated with Insulin Resistance in Indians 352; Studies on Genes Associated with Obesity
   in Indians 354; Studies on Genes Related to FCPD in Indians 354

27. Immunological and Genetic Studies on Different Clinical Types of Patients from India .................................... 358
   CB Sanjeevi, A Kanungo
   Autoimmunity in Diabetes 359; Autoimmunity and Genetics in Indian Diabetic Patients
   (Types 1 and 2) 360

SECTION 7: CLINICAL PROFILE

28. Type 1 Diabetes Mellitus: Clinical Features ........................................................................................................ 367
   Ashok Kumar Das, P Raghupathy, BB Tripathy
   Classes of Type 1 Diabetes 367; Distribution 368; Etiology 368; Natural History 368; Clinical
   Features 369

29. Clinical Features of Type 2 Diabetes Mellitus ..................................................................................................... 374
   SV Madhu, C Munichoodappa
   Types of Diabetes 374; Epidemiology 375; Natural History of Type 2 DM 375; Clinical
   Features 376; Complications of Type 2 DM at Diagnosis 378; Differential Diagnosis 378

30. Type 2 Diabetes in the Lean ................................................................................................................................ 381
   Sidhartha Das
   Peculiarities in Clinical Profile and Mortality 382; Glycemic Status and Hepatic Carbohydrate Metabolism 383;
   Hepatic Microsomal Enzyme System and Glycemic Status 384; Hormonal Profile and
   Response 385; Biochemical Milieu Vis-à-vis Complications 386; Beta-cells and Autoimmune Status 388

31. Malnutrition Modulated Diabetes Mellitus ......................................................................................................... 391
   BB Tripathy, KC Samal
   History and Epidemiology 391; Distribution 392; Clinical Feature 392; Investigations 392; Immunological and
   Genetic Studies 394; Criteria for Diagnosis 395; Complications 395; Etiology and
   Pathogenesis 396; Management 398; Comments 398

32. Fibrocalculous Pancreatic Diabetes ...................................................................................................................... 401
   V Mohan, G Premalatha
   Definition and Terminology 401; Historical Background and Prevalence 402; Clinical Presentation 403; Pathology
   405; Investigations 407; Complications 409; Long-term Survival Analysis 409; Natural History 410; Management
   410

33. Diabetes in the Young: The Indian Perspective .................................................................................................... 415
   Eesh Bhatia, Vijayalakshmi Bhatia, PS Chatterjee
   Prevalence 415; Etiology and Pathogenesis 416; Clinical Aspects 419; Complications and Mortality 421;
   Management 422
34. Secondary Diabetes
V Mohan, S Uthra

Diseases of Exocrine Pancreas 425; Endocrinopathies that Induce Diabetes 427; Other Endocrine Conditions Associated with Diabetes 432; Genetic Defects in Insulin Action 432; Genetic Syndromes Associated with Diabetes 434; Viruses and Diabetes 435; Drugs Causing Diabetes 436; Immune-mediated Diabetes 440; Secondary Diabetes in Children 440

SECTION 8: MANAGEMENT

35. An Approach to Management of Diabetes Mellitus
Anoop Misra, Jasjeet S Wasir, Naval K Vikram

Importance and Overview 447; Diabetes and Internist 447; Approach to Management 448; Principles of Therapy 450; Treatment Goals 452; Initial and Follow-up Evaluation of Diabetic Patients 452; Problems in the Management of Patients with Diabetes in India 453

36. Patient Education in Diabetes Care
Suman Kirti, MC Srivastava

Objectives for Diabetes Education 455; Organization of Education Program 456; Methods of Diabetic Education 457; Evaluating Diabetes Education 459; Details of Programs Adopted for Education 460

37. Nutrition Management of Diabetes Mellitus
Rekha Sharma, Swapna Chaturvedi

Basic Principles for Planning Diet for Diabetics 463; Nutrition Recommendations and Principles 465; Goals of Medical Nutrition Therapy 465; Realistic Diet Prescription Strategies 466; Other Nutritional Factors to Reduce Cardiac Risk 474; Meal Planning 474

38. Nutrition Management in Special Situations
Sonal V Modi

Nutrition Management in Undernutrition and Obesity 478; Nutrition Management Through Journey of Life 484; Nutrition Management in Various Treatment Modalities 488; Nutrition Management in Various Life Situations 489; Nutrition Management in Complications of Diabetes 492; Food Labeling and Interpretation 500

39. Physical Activity and Yoga in Diabetes Mellitus
BK Sahay, Rakesh K Sahay

Exercise in Normal Subjects 505; Exercise in the Management of Diabetes 508; Benefits of Exercise 508; General Principles for Exercise in Diabetes 508; Evaluation of the Patient Before Exercise 509; Exercise in the Elderly 510; Yogic Practices in Diabetes Mellitus 510; Risks of Exercise 511; Special Precautions 511; Role of Exercise in Prevention of Diabetes 512

40. Oral Antidiabetic Agents: An Overview
Ajay Kumar

Historical Perspective 515; Classification 516; Future Perspective 517

41. Insulin Secretagogues
RV Jayakumar, Ajay Kumar

Role of Insulin Secretagogues in Treatment of Type 2 Diabetes Mellitus 520; Classification of Insulin Secretagogues 520; Insulin Secretagogues and Cardiovascular Disease 525; Choosing the Right Secretagoue 526; Timing of Secretagogue Administration 527; Comparison of Various Secretagogues 527

42. Antihyperglycemic Agents (Insulin Sensitizers and Others)
Ajay Kumar

Classification 530; Insulin Sensitizers (Metformin and Phenformin) 531; Insulin Sensitizers (Thiazolidinediones) 532; Alpha Glucosidase Inhibitors (Acarbose and Miglitol) 534; Newer Antihyperglycemics: Future Directions 535
43. Insulin Therapy ..................................................................................................................................................... 539
   Anil Kapur
   History of Insulin Development  539; Insulin Manufacture and Formulation  540; Purification and
   Standardization of Insulin  541; Types of Insulin  542; Insulin Pharmacokinetics  544; Aim of Insulin
   Therapy  545; Indications for Insulin  546; Initiating Insulin Therapy  547; Insulin Regimens  549;
   Adjusting Insulin Dose  551; Factors Influencing Insulin Therapy  551; Complications of Insulin Therapy
   555; Advances in Insulin Therapy  556; Safety Issues  560; Advantages  561; Advances in Insulin
   Delivery Systems  562; Myths and Concerns about Insulin Use in Type 2 Diabetes  563; Practical
   Tips  565

Animal Insulins: Current Status ........................................................................................................................... 569
   KM Prasanna Kumar, C Munichoodappa, SR Aravind
   Immunogenicity  569; Metabolic Effects  569; Skin Reactions  570; Availability and Economics  570

44. Short-term Monitoring of Glycemic Control ........................................................................................................ 571
   Suresh D Mehtalia, Premlata K Varthakavi
   Evaluation at the Initial Hospital Visit  572; Monitoring Glycemic Control  572; Blood Glucose  576; Evaluating
   SMBG Systems  579; Self-monitoring of Blood Glucose  580; Continuous (Ambulatory) Blood Glucose Monitoring
   583; New Monitoring Device Developments  584

45. Monitoring Glycemic Control: Long-term Parameters ........................................................................................ 587
   Hemraj B Chandalia
   Historical Aspects  587; Process of Glycation of Hemoglobin  587; Methodology to Estimate Glycated Hemoglobin
   588; Methodological Problems, Selection of Method and Quality Control  589; Clinical Relevance and Application
   of Glycated Hemoglobin  590; Glycated Albumin and Fructosamine  591; Serum
   1,5-anhydroglucitol  591

46. Monitoring Beyond Glycemic Control .................................................................................................................. 594
   Ashok Kumar Das, Stalin Viswanathan
   Clinical Monitoring  595; Laboratory Monitoring  596; Organ Complications (Microvascular)  597; Organ
   Complications (Macrovascular)  600; Other Complications  602; Monitoring in High-risk Population
   604; Summary of Comprehensive Diabetes Care  605

47. Current Status of Indigenous Drugs and Alternative Medicine in the Management of Diabetes Mellitus ..... 606
   Ashok DB Vaidya, Rama Ashok Vaidya, Sanjiv Shah, Subrata Sarkar, Nutan Nabar
   Introduction and Background  606; Indigenous Drugs and Medicinal Plants  607; Pharmacology and Clinical Studies
   of Antidiabetic Medicinal Plants  608; Marketed Ayurvedic Formulations  615; Complementary and Alternative
   Medicine  615; Ayurvedic Prevention and Management  617; Dietary and Exercise Management of Diabetes  617;
   Indian Homeopathic Remedies  618

48. Transplantation in the Management of Diabetes Mellitus .................................................................................. 625
   Amy Olson, Ketan Goswami, Timothy O’Connor, Romesh Khardori
   Indications and Patient Selection  626; Transplant Options  627; Living Donor Selection Criteria  627; Procedure
   628; Nutrition after Transplant  629; Patient and Graft Survival  629; Effects of Transplant on Complications of
   Diabetes  631; Pregnancy and Pancreatic Transplant  633; Transplantation Associated
   Risks  634; Islet Cell Transplant  634

Appendix ..................................................................................................................................................................... A1–A8
Index ........................................................................................................................................................................... I1–I28
SECTION 9: COMORBID CONDITIONS

49. Comorbid Conditions: Obesity and Dysmetabolic Syndrome ................................................................. 641
   Hemraj B Chandalia, PS Lamba
   Definition and Significance of Comorbid Conditions 641; Tobacco Abuse 641; Obesity 642; Metabolic Syndrome (Multimetabolic Syndrome, Syndrome X) 648; Hyperuricemia 650; Hyperhomocysteinemia 650

50. Hypertension in Diabetes .......................................................................................................................... 655
   Sandhya A Kamath
   Etiology of Hypertension In Diabetes 655; Pathophysiology 656; Diabetic Nephropathy 657; Complications 657; Screening for Hypertension in Diabetes 657; Management of Hypertension in Diabetes 658; The Indian Scenario 662

51. Dyslipidemia in Diabetes .......................................................................................................................... 664
   Subhankar Chowdhury, Kaushik Pandit
   Lipoprotein Physiology 664; Lipoproteins and Atherosclerosis 666; Nature of Dyslipidemia in Diabetes 667; Screening for Dyslipidemia in Diabetes 669; Treatment of Dyslipidemia in Diabetes 670

SECTION 10: COMPLICATIONS

52. Diabetes Complications: Overview ........................................................................................................... 683
   SV Madhu
   Diabetes Exposure and Risk of Complications 683; Importance of Glycemic Control in Development of Chronic Complications 685; Mechanisms of Diabetic Tissue Damage 686; Cellular and Molecular Mechanisms of Hyperglycemia-induced Cellular Damage 687; Role of Oxidative Stress in Development of Diabetic Complications 690; Unifying Hypothesis for Diabetic Complications 692

53. Acute Metabolic Complications .............................................................................................................. 697
   Hemraj B Chandalia
   Diabetic Ketoacidosis 697; Hyperglycemic Hyperosmolar Nonketotic State 705; Lactic Acidosis 711

54. Hypoglycemia ............................................................................................................................................. 721
   Siddharth N Shah, Shashank R Joshi
   Definitions 721; Introduction 721; Etiology 722; Pathogenesis 723; Clinical Features 725; Investigations 725; Differential Diagnosis 726; Course and Prognosis 726; Complications 727; Management 728

55. Acute Infections in Diabetes Mellitus ...................................................................................................... 731
   BK Das, PK Das
   Common Microorganisms Associated with Infections in Diabetic Patients 733; Urinary Tract Infections 733; Respiratory Tract Infections 733; Abdominal and Gastrointestinal Infections 734; Skin and Soft Tissue Infections 734; Rhinocerebral Mucormycoses 734; Malignant Otitis Externa 735; Foot Infections 735

56. Chronic Infections in Diabetes Mellitus .................................................................................................... 737
   Samar Banerjee
   Secondary Factors 738; Chronic Infections 738; Hepatitis C and Diabetes 738; Diabetes Mellitus and Tuberculosis 740; Periodontal Disease and Diabetes Mellitus 742; HIV Infection and Diabetes 743; Rhinocerebral Mucormycosis
57. Macrovascular Disorders in Diabetes: Determinants and Risk Factors .............................................................. Sidhartha Das
Burden of Macrovascular Disease in Diabetes with Special Reference to Indian; Distribution and Profile of Atherosclerosis in Diabetic Versus Nondiabetic Persons; Likely Determinants/Risk Factors for the Development of Macrovascular Disease

58. Atherosclerosis in Diabetes: Pathogenesis ................................................................................................. V Mohan
Arterial Vessel Wall Structure; Pathology of Atherosclerosis; Fibrinolysis and Coagulation; Low Density Lipoprotein; Adhesion Molecules and Chemotactic Proteins; Early Atherosclerotic Changes in Diabetic Subjects; Inflammation; Plaque Rupture

59. Coronary Heart Disease in Diabetes ......................................................................................................... PC Manoria, Pankaj Manoria
Coronary Heart Disease in Diabetes: Epidemiology and Role of Risk Factors; Metabolic Syndrome and Cardiovascular Disease; Clinical Presentation, Complications and Mortality; Prediabetes and Coronary Heart Disease; Primary Prevention of Coronary Heart Disease in Prediabetes; Primary Prevention of Coronary Heart Disease in Diabetes; Management of Coronary Heart Disease in Diabetes

60. Epidemiology of Coronary Artery Disease in Diabetes ........................................................................ OP Gupta, Tiven Marwah
Epidemiology of Coronary Artery Disease—Global, Indian and in Immigrant Indians; Epidemiology of Coronary Artery Disease in Type 1 Diabetes Mellitus; Epidemiology of Coronary Artery Disease in Type 2 DM—Special Features; Impact of Diabetes on Coronary Artery Disease in Women; Impact of Diabetes on Coronary Artery Disease Mortality; Coronary Artery Disease in Type 2 DM having Diabetic Nephropathy; Coronary Artery Disease in Diabetes—Indian Studies; Coronary Artery Disease in Prediabetes; Prevalence of Pre-coronary Artery Disease Markers in Diabetes Mellitus

61. Non-coronary Cardiac Complications in Diabetes ................................................................................ Murlidhar S Rao
Diabetic Cardiomyopathy and Heart Failure in Diabetes; Cardiovascular Autonomic Neuropathy in Diabetes; Sudden Cardiac Death in Diabetes

62. Diabetes and Cerebrovascular Disease ................................................................................................ BC Bansal, MV Padma, JS Bajaj
Diabetes as a Risk Factor for Stroke: The Evidence-based Studies; Diabetes Associated Other Risk Factors for Stroke; Pathogenesis of Stroke and Cerebrovascular Disease in Diabetes; Stroke Subtypes and Pattern of Vascular Disease in Diabetes

63. Peripheral Arterial Disease in Diabetes ................................................................................................ Pinjala Ramakrishna
Incidence and Comorbidity; Diagnosis of Peripheral Vascular Disease in Diabetes—Noninvasive Studies; Clinical Problems and Management; Medical Management; Surgical Management

64. Diabetic Foot Syndrome .......................................................................................................................... SP Pendsey
Epidemiology; Socioeconomics; Classification; Pathogenesis; Diagnosis; Management; Prevention

65. Pathogenesis of Diabetic Microvascular Complications ........................................................................ Vijay Viswanathan
Morphologic Features; Mechanisms of Hyperglycemia-induced Damage

75. Impact of Glycemic Control on Complications of Diabetes Mellitus .......................................................... 989
   Ashok Kumar Das

   Pathophysiological Effects of Hyperglycemia 989; Historical Background—Early Trials 990; Type 1 Diabetes Mellitus—Glycemic Control and Complications 990; Type 2 Diabetes Mellitus—Glycemic Control and Complications 992; Impact of Intensive Glycemic Control in the Critical Care Setting 994; Recent Trials 994; Recommendations for Glycemic Control 994; Hazards of Intensive Glycemic Control 995

SECTION 11: DIABETES THROUGH LIFE AND EVENTS

76. Diabetes Mellitus in Neonates and Infants ......................................................................................................... 999
   PSN Menon

   Transient Neonatal Diabetes Mellitus 999; Permanent Neonatal Diabetes Mellitus 1003

77. Diabetes in Children ........................................................................................................................................... 1008
   Aspi J Irani

   Etiology 1008; Clinical Presentation 1011; Diagnosis 1011; Stages of Diabetes in Childhood 1012; Day-to-day Management 1013; Growth and Pubertal Development 1021; Diabetes Related Emergencies in Children 1022; Patient Education 1030; Psychosocial Aspects 1031

78. Diabetes in Adolescents and Young Adults ....................................................................................................... 1036
   PG Raman, N Sudha, V Mohan

   Types of Diabetes Seen in the Young 1036; Type 1 Diabetes 1037; Type 2 Diabetes in Young 1039; Maturity Onset Diabetes of Young (MODY) 1042; Fibrocalkalculous Pancreatic Diabetes 1043; Malnutrition Modulated Diabetes Mellitus 1043; Diabetes Secondary to Endocrine Disorders 1044; Genetic Syndromes and Diabetes 1044; Polycystic Ovarian Syndrome 1044

79. Diabetes in Elderly ............................................................................................................................................. 1048
   Radha Reddy, SS Rastogi, KM Prasanna Kumar

   Demographics of Diabetes in the Elderly 1048; Carbohydrate Metabolism in the Elderly 1049; Screening and Diagnosis of Diabetes 1049; Manifestations of Diabetes in the Elderly 1050; Common Geriatric Syndromes Associated with Diabetes 1050; Acute Complications of Diabetes in the Elderly 1050; Chronic Complications of Diabetes in the Elderly 1051; Treatment of Diabetes in the Elderly 1053; Management of the Elderly Diabetic in Special Situations 1056

80. Diabetes and Pregnancy (Gestational Diabetes) ............................................................................................... 1060
   V Seshiah, V Balaji

   Fuel Metabolism in Normal Pregnancy 1060; Pathogenesis of Glucose Intolerance Developing during Pregnancy 1062; Fuel Metabolism in Diabetic Pregnancy 1063; Consequences of Diabetes on the Pregnant Mother 1065; Pregestational Diabetes 1066; Gestational Diabetes Mellitus 1066; Screening for GDM 1067; Management 1070; Follow-up of GDM 1076

81. Surgery and Diabetes ......................................................................................................................................... 1080
   KM Prasanna Kumar, Geetha K Bhat

   Metabolic Issues 1081; Effect of Surgery on Diabetes 1081; Morbidity and Mortality 1081; Preoperative Evaluation 1082; Preoperative Recommendation for Type 2 Diabetics on Oral Hypoglycemic Agents (OHA) 1082; Type 2 Diabetics on Insulin 1083; Surgery in Type 1 Diabetic 1083; Moderate Control of Diabetes 1085; Postoperative Management 1085; Infections 1086; Anesthesia in a Diabetic Patient 1086; General Anesthesia 1086; Special Situation 1086; Open Heart Surgery 1087; Emergency Surgery in a Diabetic with Ketoacidosis 1087; Laparoscopic Surgery 1087; Cesarean Section 1088
SECTION 12: LIVING WITH DIABETES

82. Psychosocial Aspects of Diabetes ...................................................................................................................... 1093  
GR Sridhar  
Psychology and Diabetes—A Historical Perspective 1094; Diabetes-care Providers 1094; Lifestyle and Behavior, Perception of Life 1094; Biopsychosocial Model of Diabetes Management 1095; Studies in Children with Type 1 Diabetes Mellitus 1100; Studies in Parents of Children with Type 1 Diabetes 1101; Studies in Type 2 Diabetes 1101; Psychological Factors in Childhood Diabetes 1102; Model for Living Effectively with Diabetes 1103

83. Psychiatric Problems in Diabetes ....................................................................................................................... 1108  
MV Muraleedharan, GR Sridhar  
Coexistence of Diabetes and Psychiatric Illness 1108; Psychological Distress Caused by Screening and Diagnosis 1109; Management of Common Mental Problems 1109; Psychiatric Comorbidity in Type 1 Diabetes 1112

84. Economic Aspects, Insurance Driving and Employment Problems in Diabetics ............................................... 1116  
DK Hazra, S Sarin  
Diabetes and Life Insurance 1116; Diabetes and Personal Insurance 1117; Medical Infirmities and Driving Restrictions Under Insurance Policies 1118

SECTION 13: HEALTH CARE DELIVERY

85. Organizing a Diabetes Clinic ............................................................................................................................... 1125  
Anant Nigam, SV Madhu  
Rationale of Organized Diabetes Care 1125; Components of a Diabetes Clinic 1126; Improved Diabetes Care in Practice—The Organization Process 1127; How Does Organized Diabetes Care Become Effective? 1128; Follow Evidence-based Clinical Guidelines 1128; Guideline Implementation 1129; Patient Self-management Program 1129; Advantages of Organized Diabetes Clinic Care on Various Health Care Practices 1130; A Day at the Diabetes Clinic 1130

86. Computers in Diabetes Management ................................................................................................................1133  
GR Sridhar, PV Rao  
Electronic Medical Records 1133; Linking Electronic Medical Records to Hospital Information System 1135; Scope And Limitations of Electronic Medical Records and Hospital Information System 1137; Accessing Medical Information 1137; Bioinformatics 1138

87. Organization of Health Care for Persons with Diabetes ...................................................................................... 1140  
Vijay Panikar  
The Saint Vincent Declaration 1140; Diabetes Patient Education 1143; Problems in India 1143; Proposed Approach to Diabetes Care in India 1144

88. Role of Primary Care Physicians ......................................................................................................................... 1145  
GS Sainani, Rajesh G Sainani  
Recommended Standards of Medical Care for Diabetic Patients 1146; Role of Dietitian 1146; Self Management 1146; Patient Education 1146; Lacunae in Medical Care 1146; Primary Care-based Models 1147; Primary Care Setting 1147

89. Role of Paramedical Personnel .......................................................................................................................... 1149  
SV Madhu  
Needs of People with Diabetes 1150; Paramedical Personnel and Strict Glycemic Control 1150; Concept of Self Care and Self-management 1151; Diabetes Health Care Teams 1151; Role of Diabetes Educator in Diabetes Management 1152; Role of the Dietitian in Diabetes Management 1153; Role of the Nursing Personnel in Diabetes Management 1154; Empowering the Paramedical Personnel 1154
SECTION 14: PREVENTION

90. Prediction and Prevention of Type 1 Diabetes ................................................................................................. 1159
   CB Sanjeevi
   Immune and Genetic Markers Used in Prediction of Type 1 Diabetes 1160; Prediction of Type 1 Diabetes 1160;
   Risk Groups Likely to Benefit from Prevention Approach 1161; Prevention Trials 1161; Vaccine Strategies for the
   Prevention of Type 1 Diabetes 1162

91. Prevention of Type 2 Diabetes ........................................................................................................................... 1166
   Hemraj B Chandalia
   Target Population 1166; Diabetes Prevention Studies 1166; Lessons from Epidemiology 1168; Preferred Strategy
   for Prevention 1168

92. Prevention of Diabetes—Indian Angle ............................................................................................................... 1170
   A Ramachandran
   Primary Prevention of Diabetes 1171; Impaired Glucose Tolerance (IGT) and Impaired Fasting Glucose (IFG)
   1169; Secondary Prevention 1173

93. Youth-onset Diabetes in India: Nature of Diabetes and Use of Bovine Insulin in their Treatment ............. 1177
   N Kochupillai, R Goswami
   Subtypes of Youth-onset Diabetes in Northern India 1177; Insulin Antibody Response to Bovine Insulin Therapy
   and its Functional Significance Among Insulin Requiring Young Diabetics in India 1179

94. Prevention of Complications of Diabetes ...................................................................................................... 1180
   V Mohan, R Deepa
   Prevalence of Microvascular Complications in Indian Population 1180; Prevalence of Macrovascular Complications
   in Indian Population 1181; Diabetes Complications—Economic Burden 1181; Prevention of Complications 1181;
   Future Perspectives 1190

95. Glimpse into the Future ..................................................................................................................................... 1196
   Hemraj B Chandalia, Shaival H Chandalia
   Etiopathogenesis 1196; Self-monitoring of Blood Glucose and Glucose Sensors 1199; Therapy of Diabetes 1199;
   Complications of Diabetes 1207

Appendix .....................................................................................................................................................................A1–A8

Index ............................................................................................................................................................................I1–I28
